tomorrow's engineers *today*

# Congratulations to our class of 2021!

In 2021, Skills for Security saw 44 Apprentices completing their Fire, Emergency and Security Systems Apprenticeship. The apprenticeship is the only way to prove competency in this sector and showcases the hard work and commitment that these students have shown over the last three years. The apprenticeship is challenging and stretches the learning of all the apprentices.

As many of you are aware, the skills crisis is worsening in many sectors and the fire and security sector has not escaped this. The only way to ensure your business remains sustainable and is able to meet customer demand over the next 5 years is to recruit and train your own talent. This year's apprentices was by far the largest number in the UK, and 2022 is forecasting a significant rise in apprenticeships taking place, which we hope brings us nearer to closing the ever-growing skills gap in our sector.

Congratulations to all of you, and best of luck in your future careers.

# *Apprentice of the Year*

## **Grace McDonald**

The Skills for Security Apprentice of the Year was awarded to *Grace McDonald.*

In an ever changing fire industry, engineers need to have more than qualifications and experience. Regulations and codes of practice can change very quickly, which requires engineers to think on their feet and be able to adapt to changes. Grace's passion to learn, and interest in the industry shone through. Her knowledge didn't end at what she was taught; she always wanted to know - "But what if?". This interest and attitude made Grace an apprentice who was enjoyable to teach as she always asked for that bit more and gave it back in return with her ideas and take on the subject being taught.

The team at Skills for Security wish her the very best for the future.
